Allowable Subject Matter

1. Claims 1-20 (renumber form) allowed over the prior art.
2. The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest the following:

a means of utilizing a transaction facilitator for contacting a manufacturer for the device to order the device requested by the health care facility without communication between the health care facility and the manufacturer, wherein the manufacturer delivers the device to the health care facility without billing the health care facility; generating a cost claim for the device from the transaction facilitator to the third party payor; receiving payment at the transaction facilitator for the claim from the third party payor; and transferring funds from the transaction facilitator to the manufacturer for the payment for the device.

Kessler teaches the step of submitting a request for the device from the health care facility to the third party payor for authorization of payment and relaying the request for the device from the third party payor to a transaction facilitator, the transaction facilitator being separate from the health care facility (Kessler: Sections [0005] and [0090]).

De La Mote teaches a transaction facilitator, however, in De La Motte the transaction facilitator directly bills the entity which is the consumer or user of the product or service that the transaction facilitator is procuring for that entity, rather than billing a third party payor.

The Partnering non-patent reference teaches a centralized means for schools to utilize in billing Medicaid but does not teach a transaction facilitator that contacts a manufacturer of a device in order to order a device requested by a health care facility

Art Unit: 3626

without communication between the health care facility and the manufacturer and the Partnering reference does not teach generating a cost claim for the device from the transaction facilitator to a third party payor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

JP 2002-325048 teaches an online transaction facilitator. However, this reference has no teaching or suggestion that the transaction facilitator generates a cost claim for a device and then submits this claim to a third party payor.
